Ankit Verma

Email: ankit@gmail.com

Phone: 9123456780

Location: Bengaluru, India

Objective

Aspiring Software Engineer with strong foundation in data structures, problem solving, and backend development.

Skills

Programming Languages: Python, Java, C++

Backend: Django, Flask, REST APIs

Database: MySQL, PostgreSQL

Tools: Git, Docker, Linux

Other: Data Structures and Algorithms, System Design Basics

Projects

Student Management System - Built backend using Django with MySQL database.

Task Scheduler API - Developed REST API using Flask for task automation.

Data Analysis Project - Performed data analysis using Python and Pandas.

Experience

Backend Developer Intern at XYZ Solutions - Developed APIs and optimized database queries.

Education

B.Tech in Computer Science - ABC Institute of Technology

Achievements

Solved 400+ problems on coding platforms and participated in coding contests.
